

ED TOMPKINS, MBA

Principal Product Manager | Platform Modernization, eCommerce & API Strategy

edtompkins@gmail.com | linkedin.com/in/edltompkins | 517-677-9933 | Remote / Asheville, NC

SUMMARY

Principal product manager who turns stalled, business-critical platform programs into roadmaps that ship. \$95M+ in measurable impact across eCommerce, ERP, API, and marketplace platforms, spanning five turnarounds and three industries. I own the technical architecture most PMs defer to engineering, drive API, integration, and ecosystem strategy, and bring AI-enabled platform thinking to modernization. My approach is to earn a stalled team's trust and prove I understand the business and the technology before I change anything, then turn what is broken into something better.

SELECTED IMPACT

- \$95M+ in measurable business impact across five platform turnarounds in three industries.
- \$50M+ in new annual revenue unlocked through a repeatable product discovery framework.
- \$35M in incremental revenue from enterprise API modernization and monetization.
- \$200M+ business unit integrated onto a modernized, cloud-native ERP platform.
- Rescued failing programs at BMW (90% to 99.8% uptime, \$30M+ protected) and ZF (75% less downtime, \$15M+ saved).

CORE COMPETENCIES

Platform Modernization | eCommerce & Marketplace (VTEX) | API Strategy & Monetization | Integrations, Ecosystem & ISV Partnerships | Technical Product Management | AI-Enabled Platforms (GenAI, Applied ML) | Program Turnaround | Influence Without Authority | Cloud (AWS) | Security & Compliance (PCI, OKTA/OAuth, SOC2)

PROFESSIONAL EXPERIENCE

Senior Product Manager, Digital Marketplace & eCommerce (Contract)

Cummins Inc. | Remote | Jan 2026 - Present

- Diagnosed a stalled \$100M+ VTEX marketplace program and restored delivery within 90 days, turning a 2-year stall with no timeline into an executable strategy (pilot compressed to Q4 2026, legacy consolidation by July 2027).
- Architected consolidation of three legacy eCommerce systems into one scalable marketplace with integrated subscriptions and global payments, enabling first international expansion into Canada.
- Seized ownership of VTEX product and catalog configuration where none existed, defining foundational system design for scalability, integrations, and long-term extensibility.
- Architected an 18-month roadmap aligning marketplace migration, legacy sunset milestones, and international expansion, giving the program its first clear product vision.
- Lifted sprint throughput 20% through sharper product definition, documentation standards, and a rebalanced capacity model across legacy operations and strategic VTEX delivery.

Senior Product Manager, ERP & API Modernization

Ingram Micro | Greenville, SC | Feb 2021 - Jul 2025

Owned platform strategy for a cloud-native ERP serving a \$200M+ business; led a 20-person cross-functional organization across 18 strategic initiatives.

- Defined enterprise API strategy driving \$35M incremental revenue: modernized to .NET 8 and OKTA, built an API monetization and governance framework, and reported security standards weekly to the CISO.
- Architected an API-first extensibility roadmap and ISV partnerships that cut integration time 33%, and established PCI compliance across FinTech integrations with encrypted, secure third-party APIs.
- Challenged an approved third-party middleware architecture, partnering with the Sr. Director of Engineering on a cleaner, maintainable alternative that prevented multi-language integration debt and positioned the platform for scalable ISV partnerships.
- Accelerated enterprise customer migrations 12+ months through strategic consultation with \$10M+ accounts, converting legacy users to a modern, API-first platform.
- Built a discovery framework that unlocked \$50M+ in annual revenue through a 3-month cross-functional research initiative, then made it a repeatable model adopted across the product org.
- Led business-unit integration for \$200M+ revenue onboarding, accelerating GTM velocity 20% by embedding AI/ML use-case prioritization into platform planning.
- Drove the .NET 3.5 to 8 migration over incremental upgrades, securing 5+ years of platform viability and reducing AWS costs 35%.

- Led the first customer-facing UX overhaul since 2005 and an Agile transformation (promoted 3 BAs to Product Owners, 100% retention over 3 years), influencing outcomes across business, IT, and engineering without formal authority.

Senior Digital Product Manager (Contract)

Hill Holliday | Remote | Oct 2020 - Feb 2021

- Launched 3 priority B2C websites aligned to national banking and healthcare campaigns with zero post-launch incidents, and mentored 2 associate PMs while raising delivery velocity across concurrent tracks.

Technical Product Manager, IoT & Smart Manufacturing (Contract)

BMW Manufacturing | Greer, SC | Feb 2018 - Feb 2020

- Rescued a \$6.3M failing RTLS platform, raising uptime from 90% to 99.8% and protecting \$30M+ in annual production.
- Led the U.S. rollout of BMW's global IoT platform as on-site product SME, and established Agile practices across a 30-person cross-vendor organization.

Product Owner, Industrial IoT & Automation

ZF Group | Gray Court, SC | Mar 2013 - Feb 2018

- Built ZF's first industrial IoT platform from 0 to 1, delivering a 75% downtime reduction and \$15M+ in annual savings.
- Established ZF's first applied-AI deployment: TensorFlow-based predictive maintenance and defect detection, setting the technical foundation for later ML initiatives.

EARLIER CAREER

Progressed from IT service desk (Bob Jones University) through campus infrastructure projects to enterprise field implementation across 60+ Bank of America branches (HP), 2007 to 2013. Where the how-things-really-break instinct started.

EDUCATION & CERTIFICATIONS

Master of Business Administration (MBA), Anderson University

Bachelor of Arts in History, Minor in Psychology, Bob Jones University

Google GenAI Leader (2025) | Project Management Professional (PMP), PMI #2110770

TECHNICAL STACK

AWS | .NET | OKTA / OAuth | Microservices | REST / GraphQL APIs | VTEX Commerce | SQL | Power BI | TensorFlow / Applied ML | GenAI | PCI, SOC2
